

Support FedEx Dangerous Goods (DG) Options

Flow

Support FedEx Dangerous Goods (DG) Options

Description

As part of the new API changes in the FedEx app, we implemented the REST API integration. During implementation, FedEx Dangerous Goods (DG) support was not added.

Scenario: Display Dangerous Goods option in Product Settings

Given the customer opens the FedEx app Product Settings

When adding product-specific settings

Then an option called "Is Dangerous Goods" should be displayed in the UI.

Scenario: Display DG type options

Given the customer enables the "Is Dangerous Goods" option

Then the following options should be listed:

- LIMITED_QUANTITIES_COMMODITIES
- HAZARDOUS_MATERIALS
- ORM_D

Scenario: Include DG details in Rate and Label APIs

Given a customer generates a label for an order that has Dangerous Goods enabled

Then the Rate and Label API requests should include the specific Dangerous Goods nodes/details based on the selected DG type.
